III. You will hear a man called Dan Pearman talking on the radio about Pedal Power-a UK charity which sends bicycles to developing countries. Listen and decide the following sentences True (T) or False (F). (5points)

- 1. In 1993 Dan Pearman went to Ecuador as part of his studies.
- 2. Dan's neighbor was successful in business because he found it easy to reach customers.
- 3. Dan says charities rely on getting enough bicycles to send regularly.
- 4. The town of Rivas has almost as many bikes as Amsterdam.
- 5. In August 2000, the charity was criticized in the British media.

ĐỀ CHÍNH THỰC

Thời gian làm bài: **180** phút (không kể thời gian giao đề)

Ngày thi: 05 tháng 10 năm 2020

## Question 1. Choose the correct answer that best fits each blank. (10 points)

1. The main aim of the	campaign is to raise	of the issue inv	olved.	
A. knowledge	B. awareness	C. attention	D. acquaintance	
2. Thousands of antibio	otics, but only	about thirty are in com	mon use today.	
A. are developing B. have been developing				
C. have developed	. have developed D. have been developed			
3. I'm going totl	his magazinefo	r now and read it later.		
A. puton	B. putaway	C. putaside	D. puttogether	
4. John was the first pe	erson I sawho	spital.		
A. by leaving	B. on leaving	C. in leaving	D. on to leave	
5. The newspaper is o	wned by the Mearson G	roup,is Sir Ja	ames Bex.	
A. which chairman	B. whose chairman	C. who chairman	D. chairman	
6. If he's in trouble, it's	his own fault, I persona	ally wouldn'ta fin	ger to help him.	
A. lift	B. turn	C. bend	D. raise	
7. Iyou can	swim so well and I can't	t.		
A. hate	B. hate that	C. hate it that	D. hate it	
8. She has asked me t	oher sincere th	anks to you for what yo	u have done.	
A. report	B. convey	C. transfer	D. confide	
9. Attim	e did I ever promise you	u a pay rise.		
A. no	B. all	C. any	D. some	
10. We visited	last year.			
A. a medical famous S	cottish school	B. a famous medical S	cottish school	
C. a famous Scottish m	nedical school	D. a Scottish famous m	nedical school	
11. Although the new li	ibrary service has been	very successful, its futu	ıre iscertain.	
A. by all means	B. by no means	C. by any chance	D. at any rate	
12you lend	d me your car, I won't te	ll anybody your secret.		
A. As long as	B. As far as	C. In case	D. Even if	
13 "Why do we nee	d to get gas now? We h	nave quite a bit left?"		
- "This highway goes	through some very em	pty country, and gas sta	ations are".	
A. at the drop of a hat		B. a far cry from		
C. a fish out of water		D. few and far between	n	
14 .Although he didn't	have a ticket, Ken	come in.		
A. could	B. can	C. might	D. was allowed to	
15 If you go into the sw	vamp,alliga	tors.		
A. look into	B. look up	C. look over	D. look out for	
16. Is it necessary that	Ihere tomo	rrow?		
A. will be	B. am being	C. be	D. am	
17. His change of job h	nas him with	n a new challenge in life		
A. led	B. initiated	C. presented	D. introduced	
18. The teacher had th	e students	an essay on the positive	e and negative effects that modern	
technology has on child	dren.			

A. to write	B. to be written	C. write	D. writing
19. He said something	about "green clouds", k	out I haven't the	idea what he meant.
A. faintest	B. darkest	C. dimmest	D. weakest
20 Don't worry Harry!	That creepy video is jus	t a(n) of fic	tion.
A. piece	B. feat	C. work	D. act

## Question 2. Give the correct form of the words in parentheses. (5 points)

1. After his (expose) to the cold for such a long time, he developed hypothermia.
2. (Disturb) of the ecological balance in nature tends to have far reaching consequences on
human life.
3. Within the last few decades the computer has become the most (dispense) piece of equipment in
the office.
4. She's so (mind) that she won't let anything stand in the way of her ambition.
5. Beauty is in the eye of the (hold)
6. I don't care if you had had too much to drink. Your behavior last night was quite (defend)
7. He's so (decide)! He just can't make up his mind.
8. Tom was accused of stealing some (confidence) documents.
9. No one wanted to (friend) the obnoxious boy, so he was alone.
10. Tom spoke (breathe) because he was so excited.

# Question 3. Fill in each blank with a suitable PREPOSITION or PARTICLE. ( 5 points)

Question 3. Fill in each blank with a suitable FREFOSITION of FARTICLE. ( 3 points)
1. They setfor Paris at midnight.
2. She's very nervous the new boss.
3. I'm faithful my principle.
4. Her latest novel is coming in paperback soon.
5. Joan threw books and papersthe room whilst trying to find her passport and her cheque book.
6. According to a recent survey, most people aregood terms with their neighbors.
7. I find it hard not to surrenderthe temptation of having a chocolate ice-cream whenever I spend
my time in the café.
8. My assistant will standfor me while I'm away.
9. After a three month training period Celia gave up the nursing coursethe grounds of having no
vocation for this kind of work.
10. The carpet is designed to stand up a lot of wear and tear.

# Question 4. The passage below contains TEN mistakes. Find the mistakes and then correct them. (10points)

	,
Line	
1	Of the many unexplained phenomenon which continue to puzzle scientists and laymen like, the corn
2	circles of Southern England remain one of the most mysterious. These perfect-formed circles,
3	which, when they see from the air appear to have been inscribed with an enormous carving tool,
4	seem to be a part of a significant message; so far, however, nobody managed to decipher them,
5	and it is doubtful if anyone will ever be able to. But the main question – how the circles came to be
6	there – is just as far of being solved. Although several people had come forward claiming to have
7	made the circles themselves, scientists declare that it would be impossible for even a large group to
8	create shapes of such precision on so a large scale. These circles have become one of the strong
9	arguments in support of the existence of intelligent extra-terrestrial life forms.

### Question 5. Read the text below and Fill in each blank with ONE suitable word. (5 points.)

### **Speed limit**

A recent proposal to	limit the speed cars ca	n reach is proving controve	rsial. The idea, put (1) by the
institute for Road Sa	fety, involves (2)	vehicles with a co	ommunications box containing a digital
map of the road netw	ork. When a car is in m	otion, the communications	box – which knows how fast the vehicle
is(3)perm	nitted to travel on a par	ticular section of road - aut	tomatically regulates the car's speed. It
(4) beco	omes impossible for a v	ehicle fitted with such a (5)	to exceed the speed limit.
There are plans to (6	S) motorists	s to drive into the centre of	major cities, and a communication box
could be used to id	dentify vehicles that e	enter this zone. At preser	nt, each time a vehicle does so, its
number(7)	is photographed.	Then the number is compa	red (8) a list of authorized
vehicles, but this sys	tem is costly and (9)	from foolproof.	
The system could be	e put in place quickly if	the government wished as	part the technology has already been
developed for anothe	er purpose. Electronic	vehicle identification is (10	) with some people, who
regard it as an infring	gement of their rights. T	hey would certainly object to	o a plan to restrict the limit of their cars,
which may make the	government hesitate to	go through with it.	
Question 6 . Choose	e the word that best f	its each gap. ( 5 points)	
		Smart Dog!	
Dogs are p	probably much clever	than (1) peo	ople think, scientists say. They are
(2) tha	t dogs can count and t	hat the animals try to (3)	different messages through the
pitch and pace of the	ir barks. Animal behav	ourists used to think their b	ark was simply a way of (4)
attention. Now a new	study suggests that in	dividual dogs have (5)	barks with a range of meanings.
For example, dogs us	sually use high-pitched	single barks when they are	(6) from their owners and a
lower, harsher super-	-bark when strangers (	7) towards them	or the doorbell rings.
Dogs also kn	ow when they are rece	eiving fewer treats because	they have a basic mathematical ability
that (8) th	nem to tell when one pi	le of objects is bigger than	another. But to count, an animal has to
recognize that each o	bject in a set (9)	to a single number and t	that the last number in a (10)
represents the total r	number of objects.		
1. A. mostly	B. most of	C. almost	D. most
2. A. converted	B. persuaded	C. determined	D. convinced
3. A. transfer	B. convey	C. bear	D. suggest
4. A. paying	B. attracting	C. causing	D. devoting
5. A. specific	B. exact	C. detailed	D. specialized
6. A. split	B. detached	C. separated	D. divided
7. A. approach	B. appear	C. draw	D. move
8. A. assists	B. facilitates	C. enables	D. informs
9. A. corresponds	B. ties	C. fits	D. complements
10. A. sequence	B. system	C. progression	D. succession

### Question 7. Read the text below and then choose the best answer. (5 points)

Piracy began before the days of the Roman Empire when captured sailors and passengers were sold as slaves. Around the sixteenth and the seventeenth centuries, piracy became legitimized when famous English buccaneers were licensed by the government to attack Spanish fleets and merchant ships while Spain and England were not at war. The hiring of pirates caught on because the governments had difficulty protecting their ships and citizens from foreign pirates. In 1668, Sir Henry Morgan, one of the best known captains of a

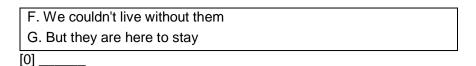

**conglomeration** of pirate ships, practically declared a war on Jamaica. His lootings of Porto Bello, the Cuban coast, Maracaibo, and Panama earned him his title and the post of lieutenant governor of Jamaica. Numerous legends associated with his marine and coastal conquests have remained as part of the folklore both in England and in the Caribbean.

One of the most **brutal** pirates was Edward Teach, nicknamed "Blackbeard" for his long, thick beard, which he tied back over his ears with a ribbon. After the war between England and Spain ended and his services were no longer needed, he turned to piracy and terrorized the Virginia and Carolina coasts. In 1713, Teach lost a marine battle between his ships and the Virginia fleet and was never heard from again.

Piracy **vanished** gradually with the onset of steam-powered seaboats that were too fast and too well equipped for a pirate frigate to overtake. The last strongholds of piracy were Pacific islands and coastal havens where boats with long galleys rowed by slaves engaged in plundering villages and capturing prisoners. British and Dutch navy patrols finally did away with these enclaves in 1863. However, till this day, piracy can be a profitable **endeavor** in remote parts of the world.

endeavor in remote	parts of the world.						
1. This passage is pr	obably taken from a longer	text on					
A. plots and episodes	s in historical tragedies	B. marine treasures and excavations					
C. the maritime histo	ry of England	D. illustrious characte	ers in the coastal battles				
2. It can be inferred f	rom the passage that the E	nglish government					
A. penalized pirates f	or crimes	B. employed pirates t	B. employed pirates to its advantage				
C. protected pirates a	as citizens	D. set out to control r	oving pirates				
3. According to the pa	assage, who was Captain N	Morgan?					
A. A mythological figu	ure	B. A famous salesma	an				
C. The governor of Ja	amaica	D. A notorious bucca	neer				
4. The word "conglo	meration" in bold is closes	t in meaning to					
A. flight	B. fleet	C. combination	D. connection				
5. It can be inferred for	rom the passage that Morg	an's feats became part	t of				
A. the English langua	age B. the English heritage						
C. maritime attraction	าร	D. marine treasures					
6. The word "brutal"	in bold is closest in meanin	g to					
A. brave	B. brusque	C. cruel	D. fashionable				
7. According to the pa	assage, Edward Teach						
A. competed with Mo	organ for fame and fortune	B. claimed portions o	f Virginia and Carolina				
C. sought solace in the	ne New World	D. had been employe	ed in war				
8. The word "vanished	ed" in bold is closest in mea	aning to					
A. disappeared	B. dispersed	C. vanquished	D. valorized				
9. The author of the p	passage implies that piracy						
A. provided plots for	novels	B. is universally condemned					
C. has not been fully	eradicated	D. has been completely absolved					
10. The word "endea	vor" in bold is closest in m	eaning to					
A. activity	B. acumen	C. adversity	D. aggression				
Question 8. Read th	ne article and choose the	sentence A - G which	best summarizes each paragraph				
(1-5) of the article. (	5points). Example: [0]	<u> </u>					
A. An old problem w	vith serious consequences						
B. Two new approach	ches, but can they solve the	e problem?					
C. Experts say 'Brin	g back maths!'						
D. A potentially trag	ic error						

E. Old methods are no longer satisfactory

Our lives depend on computers. They control our money, transport, our exam results. Yet their programs are now so complex that no one can get rid of all the mistakes. Life without computers has become unimaginable. They are designed to look after so many boring but essential tasks - from microwave cooking to flying across the Atlantic - that we have become dependent on them.

[1] \_\_\_\_\_

But as the demands placed on computers grow, so have the number of incidents involving computer errors. Now computer experts are warning that the traditional ways of building computer systems are just not good enough to deal with complex tasks like flying planes or maintaining nuclear power stations. It is only a matter of time before a computer-made catastrophe occurs.

[2] \_\_\_\_\_

As early as 1889, a word entered the language that was to become all too familiar to computer scientists: a 'bug', meaning a mistake. For decades bugs and 'de-bugging' were taken to be part of every computer engineer's job. Everyone accepted that there would always be some mistakes in any new system. But 'safety critical' systems that fly planes, drive trains or control nuclear power stations can have bugs that could kill. This is obviously unacceptable.

[3] \_\_\_\_\_

One way to stop bugs in computer systems is to get different teams of programmers to work in isolation from each other. That way, runs the theory, they won't all make the same type of mistake when designing and writing computer codes. In fact research shows that programmers think alike, have the same type of training and make similar mistakes. So even if they work separately, mistakes can still occur. Another technique is to produce back up systems that start to operate when the first system fails. This has been used on everything from the space shuttle to the A320 airbus, but unfortunately problems that cause one computer to fail can make all the others fail, too.

[4]

A growing number of computer safety experts believe the time has come to stop trying to 'patch up' computer systems. They say programmers have to learn to think clearly and to be able to demonstrate through mathematical symbols that the program cannot go seriously wrong. Until programmers learn to do this, we will probably just have to live with the results of computer bugs.

[5] \_\_\_\_\_

Of course, more often than not the errors are just annoying, but sometimes they can come close to causing tragedies. On the Picadilly line in London's Underground a driver who was going south along a track got confused while moving his empty train through a cross-over point. He started to head north straight at a south-bound train full of people. The computerized signaling system failed to warn him of impeding disaster and it was only his quick human reactions that prevented a crash.

### Question 10. Read the passage and do the tasks that follow. (5 points)

A.

Besides the earth's oceans, glacier ice is the largest source of water on earth. A glacier is a massive stream or sheet of ice that moves underneath itself under the influence of gravity. Some glaciers travel down mountains or valleys, while others spread across a large expanse of land. Heavily glaciated regions such as Greenland and Antarctica are called continental glaciers. These two ice sheets encompass more than 95% of the earth's glacial ice. The Greenland ice sheet is almost 10,000 feet thick in some areas, and the weight of this glacier is so heavy that much of the region has been depressed below sea level. Smaller glaciers that occur at higher elevations are called alpine or valley glaciers. Another way of classifying glaciers is in terms of their internal temperature. In temperate glaciers, the ice within the glacier is near its melting point. Polar glaciers, in contrast, always maintain temperatures far below melting.

#### В.

The majority of the earth's glaciers are located near the poles, though glaciers exist on all continents, including Africa and Oceania. The reason glaciers are generally formed in high alpine regions is that they require cold temperature throughout the year, in these areas where there is little opportunity for summer ablation (loss of mass), snow changes to compacted firm and then crystallized ice. During periods in which melting and evaporation exceed the amount of snowfall, glaciers will retreat rather than progress. While glaciers rely heavily on snowfall, other climatic conditions including freezing rain, avalanches and wind, contribute to their growth. One year of below average precipitation can stunt the growth of a glacier tremendously. With the rare 7 exception of surging glaciers, a common glacier flows about 10 inches per day in the summer and 5 inches per day in the winter. The fastest glacial surge on record occurred in 1953, when the Kutiah Glacier in Pakistan grew more than 12 kilometers in three months.

C.

The weight and pressure of ice accumulation causes glacier movement. Glaciers move out from under themselves, via plastic deformation and basal slippage. First, the internal flow of ice crystals begins to spread outward and downward from the thickened snow pack also known as the zone of accumulation. Next, the ice along the ground surface begins to slip in the same direction. Seasonal thawing at the base of the glacier helps to facilitate this slippage. The middle of a glacier moves faster than the sides and bottom because there is no rock to cause friction. The upper part of a glacier rides on the ice below. As a glacier moves it carves out a U-shaped valley to a riverbed, but with much steeper walls and flatter bottom.

D.

Besides the extraordinary rivers of ice, glacial erosion creates other unique physical features in the landscape such as horns, fjords, hanging valleys, and cirques. Most of these landforms do not become visible until after glaciers have receded. Many are created by moraines, which occur at the sides and front of a glacier. Moraines are formed when material is picked up along the way and deposited in a new location. When many alpine glaciers occur on the same mountain, these moraines can create a horn. The matter horn, in the Swiss Alps is one of the most famous horns. Fjords, which are very common in Norway, are coastal valleys that fill with ocean water during a glacial retreat. Hanging valleys occur when two or more glacial valleys intersect at varying elevations. It is common for waterfalls to connect the higher and lower hanging valleys, such as in Yosemite National Park. A cirque is a large bowl-shaped valley that forms at the front of a glacier. Cirques often have a lip on their down slope that is deep enough to hold small lakes when the ice melts away.

E.

Glacier movement and shape shifting typically occur over hundreds of years. While presently about 10% of the earth land is covered with glaciers, it is believed that during the last Ice. Age. glaciers covered approximately 32% of the earth's surface. In the past century, most glaciers have been retreating rather flowing forward. It is unknown whether this glacial activity is due to human impact or natural causes, but by studying glacier movement, and comparing climate and agricultural profiles over hundreds of years, glaciologists can begin to understand environmental issues such as global warming.

### Choose the most suitable heading for each paragraph

I. Glacial continents	V. Glaciers through the years
II. Formation and growth of Glaciers	VI. Types of Glaciers
III. Glacial Movement	VII. Glacial Effects on Landscape
IV. Glaciers in the last Ice Age	VIII. Glaciers in National Parks

1. Paragraph	Α										
2. Paragraph	В										
3. Paragraph	С	_	_	_	_	_	_	_	_	_	_

4. Paragraph **D** ......

5. Paragraph E .....

Write T (true), F (false) or NG (not given) before each statement	
6 Glaciers exist only near the north and south poles.	
7 Glaciers are formed by a combination of snow and other	weather conditions.
8 Glaciers normally move at a rate of about 5 to 10 inches	a day.
9 All parts of the glacier move at the same speed.	
10 During the last Ice Age, average temperatures were much	ch lower than they are now.
Question 9. Finish each of the following sentences in such a water before it. (5 points)	vay that it means exactly the sentence
It was an impressive building but it wasn't to my taste> Impressive	
2. If Mike hadn't been interested, the trip would have been cancelled -> But	
3. I left without saying goodbye as I didn't want to disturb the meeting -> Rather than	_
4. She didn't cry when the story ended in tragedy> Not a tear	
5. The population of the U.K has not expanded appreciably in the las -> There has been no	
Question 10. For each of the sentences below, write a new sentence to the original sentence, using the word given in capital letters way. (5 points)	
1.The new boss is not very popular with his employees>	(take)
Tear gas was released as soon as the thieves touched the safe>	(sooner)
3. Bruce said that the situation at work was like a family argument>	
4. It is said that he was born in Segovia>	(reputed)
5. I think you should be tolerant of other people's weaknesses.	

Question 11. In about 120 words, write a paragraph about the changes that information technology brings to your study.(15pts)
